SUBJECT: Implementation of Changes in the End-Stage Renal Disease (ESRD) Prospective Payment System (PPS) and Payment for Dialysis Furnished for Acute Kidney Injury (AKI) in ESRD Facilities for Calendar Year (CY) 2025

I. SUMMARY OF CHANGES: The purpose of this Change Request (CR) is to implement the CY 2025 rate updates and policies for the ESRD PPS and for payments for renal dialysis services furnished to beneficiaries with AKI in ESRD facilities, and to implement the Transitional Drug Add-on Payment Adjustment (TDAPA) effective January 1, 2025, for new Healthcare Common Procedure Coding System (HCPCS) codes. This recurring update notification applies to Publication 100-02, Medicare Benefit Policy Manual, Chapter 11, Section 50.

EFFECTIVE DATE: January 1, 2025
**Unless otherwise specified, the effective date is the date of service.*
IMPLEMENTATION DATE: January 6, 2025

III. FUNDING:
For Medicare Administrative Contractors (MACs):
The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

I. SUMMARY OF CHANGES: The purpose of this Change Request (CR) is to implement the CY 2025 rate updates and policies for the ESRD PPS and for payments for renal dialysis services furnished to beneficiaries with AKI in ESRD facilities, and to implement the Transitional Drug Add-on Payment Adjustment (TDAPA) effective January 1, 2025, for new Healthcare Common Procedure Coding System (HCPCS) codes. This recurring update notification applies to Publication 100-02, Medicare Benefit Policy Manual, Chapter 11, Section 50.

II. GENERAL INFORMATION

A. Background: CY 2025 ESRD PPS and AKI Dialysis Payment Updates: Effective January 1, 2011, CMS implemented the ESRD PPS based on the requirements of section 1881(b)(14) of the Social Security Act (the Act). The ESRD PPS provides a single per treatment payment to ESRD facilities that covers all the resources used in furnishing an outpatient dialysis treatment. The ESRD PPS base rate is adjusted to reflect patient and facility characteristics that contribute to higher per treatment costs.

In accordance with section 1834(r) of the Act, as added by section 808(b) of the Trade Preferences Extension Act of 2015, CMS pays ESRD facilities for furnishing renal dialysis services to Medicare beneficiaries with AKI. CR 9598 implemented the payment for AKI renal dialysis services and provides detailed information regarding payment policies.

The ESRD PPS includes consolidated billing requirements for limited Part B services included in the ESRD facility's bundled payment. CMS periodically updates the lists of items and services that are subject to Part B consolidated billing and are therefore no longer separately payable when provided to ESRD beneficiaries by providers other than ESRD facilities.

Payment for Oral-Only Drugs: In accordance with section 217(c) of the Protecting Access to Medicare Act (Pub. L. 113-93), the Centers for Medicare & Medicaid Services (CMS) codified in regulation a drug designation process for: (1) determining when a product is no longer an oral-only drug; and (2) including new injectable and intravenous products into the ESRD PPS. Under the drug designation process, CMS provides additional payment using a Transitional Drug Add-on Payment Adjustment (TDAPA) for qualifying new injectable or intravenous drugs and biological products under 42 Code of Federal Regulation (CFR) 413.234(c).

In the CY 2016 ESRD PPS final rule (80 FR 68968), CMS finalized regulations at 42 CFR 413.174(f)(6), which state that effective January 1, 2025, payment to an ESRD facility for renal dialysis service drugs and biologicals with only an oral form furnished to ESRD patients is incorporated within the prospective payment system rates established by CMS in Subsection (§) 413.230 and separate payment will no longer be provided.

Transitional Drug Add-on Payment Adjustment (TDAPA): The TDAPA is a payment adjustment under the ESRD PPS for certain new renal dialysis drugs and biological products. As discussed in the CY 2019 and CY 2020 ESRD PPS final rules, for new renal dialysis drugs and biological products that fall into an existing ESRD PPS functional category, the TDAPA helps ESRD facilities to incorporate new drugs and biological products and make appropriate changes in their businesses to adopt such products, provides additional payments for such associated costs, and promotes competition among the products within the ESRD PPS functional categories, while focusing Medicare resources on products that are innovative (83 FR 56935; 84 FR 60654). For new renal dialysis drugs and biological products that do not fall within an existing ESRD PPS functional category, the TDAPA is a pathway toward a potential base rate modification (83 FR 56935). The TDAPA eligibility requirements are set forth in the ESRD PPS regulations at 42 C.F.R. § 413.234. CMS generally bases the TDAPA on 100 percent of average sales price (ASP). If ASP is not available, the TDAPA is based on 100 percent of Wholesale Acquisition Cost (WAC) and, when WAC is not available, the payment is based on the drug manufacturer's invoice. Under CMS's conditional ASP reporting policy at § 413.234(c), as finalized in the CY 2020 ESRD PPS final rule (84 FR 60679) and clarified in the CY 2024 ESRD PPS final rule (88 FR 76409), if CMS determines that the latest full calendar quarter of ASP data is not available for any drug paid for using the TDAPA, we would stop applying the TDAPA for the new renal dialysis drug or biological product within the next 2-calendar quarters.

The TDAPA for a new renal dialysis drug or biological product that is used to treat or manage a condition for which there is an existing ESRD PPS functional category is paid for a period of 2 years. Following payment of the TDAPA, the ESRD PPS base rate will not be modified. While the TDAPA applies to a new renal dialysis drug or biological product, the drug or biological product is not considered an ESRD outlier service. The ESRD PPS includes Consolidated Billing (CB) requirements for limited Part B services included in the ESRD facility's bundled payment. CMS periodically updates the lists of items and services that are subject to Part B consolidated billing and are therefore no longer separately payable when provided to ESRD beneficiaries by providers other than ESRD facilities.

CMS reviews and issues TDAPA payment determinations on a quarterly basis for new renal dialysis drugs or biological products that fit within an existing ESRD PPS functional category.

Transitional Add-on Payment Adjustment for New and Innovative Equipment and Supplies (TPNIES): Beginning January 1, 2020, the ESRD PPS provides the TPNIES for new and innovative renal dialysis equipment and supplies that qualify under 42 C.F.R. § 413.236. The TPNIES payment is based on 65 percent of the Medicare Administrative Contractor (MAC) determined price. The TPNIES is paid for 2 calendar years, beginning on January 1 and ending on December 31. While the TPNIES applies to a new and innovative equipment or supply, the equipment or supply is not considered an outlier service. CR 11869 created the system changes necessary to implement the TPNIES.

Capital Related Assets (CRA) Eligible for the TPNIES: Beginning January 1, 2021, the TPNIES policy was expanded to include CRA that are home dialysis machines when used in the home for a single patient. The TPNIES for CRA is based on 65 percent of the MAC determined price. The MACs, on behalf of CMS, establish prices for new and innovative renal dialysis equipment and supplies, including certain CRAs that are home dialysis machines, that meet the TPNIES eligibility criteria using verifiable information from the following sources, if available: (1) the invoice amount, facility charges for the item, discounts, allowances, and rebates; (2) the price established for the item by other MACs and the sources of information used to establish that price; (3) payment amounts determined by other payers and the information used to establish those payment amounts; and (4) charges and payment amounts required for other equipment and supplies that may be comparable or otherwise relevant. The CRA for TPNIES is paid for 2 calendar years, beginning on January 1 and ending on December 31. Following payment of the CRA for TPNIES, the ESRD PPS base rate will not be modified and the new CRA that is a home dialysis machine will not be an eligible outlier service as provided in section 413.237. CR 12347 created the system changes necessary to implement the TPNIES for CRA under the ESRD PPS.

Post-TDAPA Add-on Payment Adjustment: Beginning January 1, 2024, the ESRD PPS provides additional payment for certain new renal dialysis drugs and biological products after the end of the TDAPA period

under section 413.234(g). The post-TDAPA add-on payment adjustment is applied to all ESRD PPS payments and is calculated using utilization of the drug or biological product during the most recent twelve-month period for which data is available. The post-TDAPA add-on payment adjustment is calculated annually and is applied for 12 calendar quarters following the end of the TDAPA period for a drug or biological product, conditional on the receipt of ASP data. The post-TDAPA add-on payment adjustment amount is then multiplied by the patient-level case-mix adjustment factors for the patient and is added on to the ESRD PPS payment.

Transitional Pediatric ESRD Add-on Payment Adjustment (TPEAPA): Beginning January 1, 2024, the ESRD PPS provides the TPEAPA for all claims for services provided to pediatric ESRD patient under section 413.235(b)(2). The TPEAPA is equal to 30 percent of the per-treatment payment amount for the pediatric ESRD patient. The TPEAPA will be applied for CYs 2024, 2025 and 2026.

B. Policy: CY 2025 ESRD PPS and AKI Dialysis Payment Updates: Section 1881(b)(14)(F) of the Act requires an annual increase to the ESRD PPS base rate by an ESRD market basket increase factor, reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act. That is, the ESRD bundled market basket increase factor minus the productivity adjustment will update the ESRD PPS base rate. In accordance with section 1834(r) of the Act, the payment rate for renal dialysis services provided to beneficiaries with AKI is the ESRD PPS base rate adjusted by the ESRD PPS wage index and, at the Secretary's discretion, adjusted on a budget neutral basis by any other adjustment factor applied under the ESRD PPS.

ESRD PPS Base Rate:

- A budget-neutrality adjustment factor for the wage index and related policies of 0.988600
- A productivity-adjusted market basket increase of 2.2 percent
- The CY 2025 ESRD PPS base rate is $273.82 (($271.02 × 0.988600) × 1.022 = $*273.82*).

Labor-related share:

- The labor-related share is 55.2 percent.

Wage index:

Effective beginning in CY 2025, the ESRD PPS uses a new ESRD PPS wage index methodology, which utilizes Bureau of Labor Statistics wage data by geographic area weighted by occupational mix based on freestanding ESRD facility cost report full-time equivalent data.

- The CY 2025 ESRD PPS wage index is updated to reflect the most recent wage data and the most recent full year of freestanding ESRD facility cost report data.
- A five percent cap will be applied to the reduction in the wage index for ESRD facilities from CY 2024.
- The wage index floor is 0.6000.
- The ESRD PPS wage index for an ESRD facility will be based on the most recent Core-Based Statistical Area (CBSA) delineations according to OMB 23-01 (Office of Management and Budget).

Rural Adjustment Transition Policy:

Effective beginning in CY 2025 the ESRD PPS rural adjustment will be determined based on the most recent CBSA delineations according to OMB 23-01. ESRD facilities which received the 0.8 percent rural adjustment in CY 2024 but were re-designated into an urban CBSA under the most recent delineations would receive a transitional phase-out of the rural adjustment wherein the ESRD facility would receive two-thirds of the adjustment (0.53 percent) for CY 2025, one-third of the adjustment (0.27 percent) for CY 2026, and no rural adjustment for CY 2027. For CY 2025 this is a payment adjustment factor of 0.0053. For the

calculation of the imputed MAP under the outlier payment, the 2/3rds of the current 2.2 percent reduction factor would also be applied to the average MAP, with the resulting multiplicative factor being 0.9853.

Outpatient Provider Specific File (PSF) Changes

Effective CY 2023, a permanent five percent cap was adopted and applied to all ESRD facilities on any decrease to an ESRD facility's CY 2025 final wage index from its final wage index in the prior year. Under the five percent cap policy, a new ESRD facility that opens during CY 2025 would be paid the wage index for the area in which it is geographically located for its first full or partial CY with no cap applied, because a new ESRD facility would not have a wage index in the prior CY.

In addition, as discussed earlier, for CY 2025 we are phasing out the rural adjustment for ESRD facilities that will become urban in CY 2025 because of the adoption of the revised CBSA delineations based on OMB Bulletin 23–01 over a period of three years.

To implement this policy for CY 2025, MACs must update the following fields in the Provider Specific File (PSF) for all ESRD facilities:

- **Supplemental Wage Index** - used for the prior CY wage index value
- **Supplemental Wage Index Indicator** - used to indicate the value in the "Supplemental Wage Index" field is the prior CY wage index and whether a rural transition applies.

MACs must update the "Supplemental Wage Index" and "Supplemental Wage Index Indicator" for all facilities that were active in CY 2024.

MACs must follow the steps below to ensure the appropriate values are applied in the Supplemental Wage Index and Supplemental Wage Indicator fields:

1. If the facility was not active for CY 2024, then skip all of the below steps and leave the "Supplemental Wage Index" and "Supplemental Wage Index Indicator" fields blank. If the facility was active for CY 2024, then follow the steps below.
2. Validate the accuracy of the facility's Federal Information Processing Standard (FIPS) state and county codes.
3. Validate the accuracy of the facility's CY 2024 CBSA based on the facility's FIPS state and county codes and the CBSA delineations defined in Office of Management and Budget Bulletin No. 18–04.
4. Identify the CY 2024 ESRD PPS wage index calculated by the pricer software and used to pay claims for each ESRD facility in CY 2024, and add this wage index value to "Supplemental Wage Index" field
5. Identify the ESRD facility's CY 2025 CBSA based on its FIPS state and county codes and the CBSA delineations defined in OMB Bulletin 23-01.
6. If the ESRD facility's CY 2024 CBSA was rural and its CY 2025 CBSA is urban, then update the value of "Supplemental Wage Index Indicator" to be "2". Otherwise, for all other ESRD facilities that were active for CY 2024, update the value of "Supplemental Wage Index Indicator" to be "1".

Outlier Policy:

- CMS made the following updates to the adjusted average outlier service Medicare Allowable Payment (MAP) amount per treatment:
    - The adjusted average outlier service MAP amount per treatment is $31.02 for adult patients.
    - The adjusted average outlier service MAP amount per treatment is $59.60 for pediatric patients.

- CMS made the following updates to the Fixed Dollar Loss (FDL) amount that is added to the predicted MAP to determine the outlier threshold:
    - The FDL amount is $45.41 for adult patients.

    - The FDL amount is $234.26 for pediatric patients.

- CMS made the following changes to the list of outlier services:
    - Effective January 1, 2025, all renal dialysis drugs and biological products, except those currently paid for using TDAPA, are eligible for the outlier payment.
    - Renal dialysis drugs that are oral equivalents to injectable drugs are based on the most recent prices obtained from the Medicare Prescription Drug Plan Finder, are updated to reflect the most recent mean unit cost. In addition, CMS will add or remove any renal dialysis items and services as necessary. See Attachment A.
    - The mean dispensing fee of the National Drug Codes (NDCs) qualifying for outlier consideration is revised to $0.58 per NDC per month for claims with dates of service on or after January 1, 2025. See Attachment A.

Outlier Policy Methodological Changes:

- CMS made the following methodological changes to the outlier calculation beginning in CY 2025.
    - The imputed MAP for a claim will be increased by the case-mix adjusted post-TDAPA add-on payment amount applied to that claim
    - The price proxy for drugs and biological products utilized in the calculation of the adult and pediatric FDL amounts is calculated using actual spending data.
    - The price proxy for laboratory tests and supplies utilized in the calculation of the adult and pediatric FDL amounts is the growth of these items in the ESRDB market basket.

Post-TDAPA add-on payment adjustment amounts:

For CY 2025 two drugs, Korsuva and Jesduvroq are set to be included in the calculation of the post-TDAPA add-on payment adjustment. Korsuva will be included for all four calendar quarters at an amount of $0.4601 and Jesduvroq will be included for only the fourth quarter at an amount currently estimated to be $0.0096. We will publish the final post-TDAPA add-on payment amount for Jesduvroq once a full year's worth of utilization data is available. The estimated post-TDAPA add-on payment adjustment amounts for each quarter of CY 2025 are as follows:

Q1 (January - March): $0.4601 (Korsuva only)

Q2 (April - June): $0.4601 (Korsuva only)

Q3 (July - September): $0.4601 (Korsuva only)

Q4 (October - December): $0.4697 (Korsuva and Jesduvroq)

TDAPA for phosphate binders:

Effective January 1, 2025, oral-only phosphate binders qualify for the TDAPA. ESRD facilities should report the AX modifier (item furnished in conjunction with dialysis services) with the Healthcare Common Procedure Coding System (HCPCS) for these drugs and biological products to receive payment for these drugs using the TDAPA. While these drugs are eligible for the TDAPA, they do not qualify toward outlier payment calculation. Phosphate binders will be reported on ESRD PPS claims using the following HCPCS codes:

- J0601, “Sevelamer carbonate (Renvela or therapeutically equivalent), oral, 20 mg (for ESRD on dialysis)”
- J0602, “Sevelamer carbonate (Renvela or therapeutically equivalent), oral, powder, 20 mg (for ESRD on dialysis)”

- J0603, “Sevelamer hydrochloride (Renagel or therapeutically equivalent), oral, 20 mg (for ESRD on dialysis)”
- J0605, “Sucroferric oxyhydroxide, oral, 5 mg (for ESRD on dialysis)”
- J0607, “Lanthanum carbonate, oral, 5 mg (for ESRD on dialysis)”
- J0608, “Lanthanum carbonate, oral, powder, 5 mg, not therapeutically equivalent to J0607 (for ESRD on dialysis)”
- J0609, “Ferric citrate, oral, 3 mg ferric iron, (for ESRD on dialysis)”
- J0615, “Calcium acetate, oral, 23 mg (for ESRD on dialysis)”

Phosphate binders are drugs that are used for the maintenance of bone and mineral metabolism. Bone and mineral metabolism is an ESRD PPS functional category where drugs and biological products that fall in this category are always considered to be used for the treatment of ESRD. ESRD facilities will not receive separate payment for phosphate binders with or without the AY modifier, and the claims shall process the line item as covered with no separate payment under the ESRD PPS. The ESRD PPS consolidated billing requirements for CY 2025 have been updated to include the above HCPCS codes for phosphate binders.

In addition, for CY 2025, a fixed amount of $36.41 will be added to the TDAPA calculation for each monthly claim that includes phosphate binders. FISS will add this amount to the calculation of payer only value code Q8 – Total TDAPA Amount on the monthly ESRD claim.

Example Calculations

Pricer puts a payment at the dialysis line so that it is a per treatment payment. There is a calculation that happens in pricer to divide Q8 by the total number of dialysis treatments and then that per treatment amount is added to each dialysis line. In the example below, for illustration purposes, a fixed amount of $36.41 is added to the amount reported in value code Q8.

Example 1: Patient is prescribed 1000mg 3 times per week with a payment limit of $3.50 per 20 mg. ***Note: all lines in the example below are billed with the AX modifier. Each date of service also includes a dialysis line with REV 0821 and HCPCS 90999, which are not shown.***

1/1/2025 REV 0636 HCPCS J0601 AX, 50 units

1/3/2025 REV 0636 HCPCS J0601 AX, 50 units

1/5/2025 REV 0636 HCPCS J0601 AX, 50 units

1/29/2025 REV 0636 HCPCS J0601 AX, 50 units

1/31/2025 REV 0636 HCPCS J0601 AX, 50 units

Additional amount added to Q8 = $36.41

Q8 is assigned $2486.41 (((50 * 3.50) * 14) + $36.41 = $2486.41)

Number of dialysis treatments for month = 14

Adjusted ESRD PPS base rate = $270.00

Quality Incentive Program (QIP) reduction = 0.985

Cost of TDAPA drug/ number of dialysis treatments for the month = TDAPA payment per treatment

$2486.41/ 14 = $177.60

Final Payment Rate = (Adjusted ESRD PPS base rate + TDAPA payment per treatment) * QIP reduction

$440.89 = ($270.00 + $177.60) * 0.985

The final per treatment payment rate is $440.89

Example 2: Patient is prescribed two different phosphate binders in the month (1000mg 3 times per week for 3 weeks with a payment limit of $3.50 per 20 mg and 1,500 mg 3 times per week for the rest of the month with a payment limit of $0.50 per 5mg). In this example, the additional amount added to Q8 is the same as example 1, because the additional amount is added once per monthly claim. ***Note: all lines in the example***

below are billed with the AX modifier. Each date of service also includes a dialysis line with REV 0821 and HCPCS 90999, which are not shown.

1/1/2025 REV 0636 HCPCS J0601 AX, 50 units

1/24/2025 REV 0636 HCPCS J0607 AX, 300 units

1/26/2025 REV 0636 HCPCS J0607 AX, 300 units

1/29/2025 REV 0636 HCPCS J0607 AX, 300 units

1/31/2025 REV 0636 HCPCS J0607 AX, 300 units

Additional amount added to Q8 = $36.41

Q8 is assigned $2361.41 (((50 * 3.50) * 9) + ((300 * 0.50) * 5) + $36.41 = $2361.41)

Number of dialysis treatments for month = 14

Adjusted ESRD PPS base rate = $270.00

Quality Incentive Program (QIP) reduction = 0.985

Cost of TDAPA drug/ number of dialysis treatments for the month = TDAPA payment per treatment

$2361.41/ 14 = $168.67

Final Payment Rate = (Adjusted ESRD PPS base rate + TDAPA payment per treatment) * QIP reduction

$432.09 = ($270.00 + $168.67) * 0.985

The final per treatment payment rate is $432.09

Low Volume Payment Adjustment (LVPA) Tiered Methodology:

- Effective January 1, 2025, ESRD facilities. which are eligible for the LVPA, are divided into one of two tiers based on the median treatment count of the past three cost-reporting years.
    - ESRD facilities that furnished a median of fewer than 3,000 treatments over the past three cost reporting years will be categorized as Tier 1 and will receive an LVPA of 28.9 percent.
    - ESRD facilities that furnished a median of between 3,000 and 4,000 treatments over the past three cost reporting years will be categorized as Tier 2 and will receive an LVPA of 18.3 percent.

Reporting Policy for Discarded Amounts of Renal Dialysis Drugs and Biological Products Paid for Under the ESRD PPS Beginning CY 2025

Beginning January 1, 2025, ESRD facilities are required to report discarded billing units on a separate claim line containing a JW modifier for all renal dialysis drugs and biological products from single-dose containers or single-use packaging. When a renal dialysis drug or biological product from a single-dose container or single-use packaging is reported on an ESRD PPS claim and there is no discarded amount, ESRD facilities are required to attest that there is no discarded amount by reporting a JZ modifier on the claim line along with the amount of drug or biological product administered. When billing for any renal dialysis drug or biological product from a single-dose container or single use package that is provided to beneficiaries for use while receiving home dialysis services as defined in § 413.217, or oral forms of renal dialysis drugs and biological products, ESRD facilities should use the best information they have in determining the amount expected to be discarded in a given month, including fill information from the pharmacy and the patient's plan of care.

Attachment C outlines the current list of HCPCS codes identified as single-dose container and single-use packaging renal dialysis drugs and biological products for which the JW or JZ modifier must be reported. Further information about system edits to enforce these reporting requirements will be forthcoming in a future CR. The list in Attachment C is not an exhaustive list of the drugs and biological products subject to the JW and JZ reporting requirement under the ESRD PPS. All ESRD facility claims for renal dialysis drugs and biological products from a single-dose container or single-use packaging must include either the JW or JZ modifier. When billing for a renal dialysis drug or biological product, an ESRD facility should refer to the label information to determine whether it is a single-dose container or single-use packaging. For public awareness, Attachment D provides a list of HCPCS codes that include NDCs for

multi-dose containers as well as single-dose containers or single-use packaging. This reporting requirement is discussed in further detail in the following paragraphs.

As we discussed in the CY 2024 ESRD PPS final rule (88 FR 76380), the Medicare Part B JW modifier policy, in effect since 2017, generally does not apply to drugs that are not separately payable. The ESRD PPS statute generally requires a single bundled payment for renal dialysis services. Specifically, section 1881(b)(14)(A)(i) of the Act requires the Secretary to implement a payment system under which a single payment is made to a provider of services or a renal dialysis facility for renal dialysis services in lieu of any other payment. The only exception is for oral-only drugs, as defined at 42 C.F.R. § 413.234(a), which are paid separately under Medicare Part D until January 1, 2025, in accordance with 42 C.F.R. § 413.174(f)(6). Section 204 of the Stephen Beck, Jr., Achieving a Better Life Experience Act of 2014 (ABLE) (Pub. L. 113–295) amended section 632(b)(1) of the American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112– 240), as amended by section 217(a)(1) of the Protecting Access to Medicare Act of 2014 (PAMA) (Pub. L. 113–93), to provide that payment for oral-only renal dialysis drugs and biological products cannot be made under the ESRD PPS bundled payment prior to January 1, 2025. However, ESRD facilities are instructed to report the JW modifier in certain circumstances. Current guidance in Chapter 17, section 40.1 of the Medicare Claims Processing Manual states that the ESRD facility must bill the program using the JW modifier for the amount of Erythropoiesis Stimulating Agents (ESAs) appropriately discarded if a home dialysis patient must discard a portion of the ESA supply due to expiration of a vial, because of interruption in the patient's plan of care, or unused ESAs on hand after a patient's death. Most recently, the March 15, 2022, CR that established the TDAPA for KorsuvaTM (difelikefalin), instructs facilities to use the JW modifier to report the amount of difelikefalin that is discarded and eligible for payment under the ESRD PPS.

Additionally, although renal dialysis drugs and biological products paid under the ESRD PPS are not considered separately payable, we note that ESRD facilities are permitted to bill and receive separate payment using the AY modifier for drugs and biological products that are not related to the treatment of ESRD. Any separately payable drugs or biological products that ESRD facilities bill for using the AY modifier would generally be subject to the Medicare Part B drug refund program and reporting requirements for the JW and JZ modifiers.

As we further discussed in the CY 2024 ESRD PPS final rule, our longstanding policy for payment under the ESRD PPS, including the calculation of the TDAPA and outlier payment adjustments, includes payment for units of renal dialysis drugs and biological products billed with the JW modifier, but does not allow payment for overfill units. That is, the current ESRD PPS payment policy is consistent with the broader Medicare Part B policy to pay for the unused and discarded amount, as well as the dose administered, up to the amount of the drug indicated on the vial or package labeling.

Lastly, as discussed in the CY 2024 ESRD PPS final rule, ESRD facilities should not report discarded amounts of renal dialysis drugs or biological products from multi-use vials. Discarded amounts of renal dialysis drugs and biological products from multi-use vials should not be billed on ESRD PPS claims.

The following serves to clarify billing guidelines and provide examples of proper billing for renal dialysis drugs and biological products from single-dose containers or single-use packaging:

- ESRD facilities are reminded to ensure amounts of drugs administered to patients are accurately reported in terms of the dosage specified by the HCPCS code descriptor.

- When submitting Medicare claims, units of service should be reported in multiples of the dosage included in the HCPCS code descriptor. If the dosage given is not a multiple of the number provided in the HCPCS code description, the ESRD facility shall round up to the nearest whole number to express the number as a multiple.

- The ESRD facility must follow these steps when billing for any discarded amount of a renal dialysis drug or biological product from a single-dose container or single-use package after administering the prescribed dosage of any given drug.

1. The drug must be from a single-dose container or single-use package. Multi-dose containers and multi-use packaging are not expected to result in discarded amounts of the drug.

2. The units billed should correspond with the labeled amount of the product that is actually purchased to prepare the dose. Where possible, ESRD facilities should use the smallest dose (vial) available for purchase from the manufacturer(s) that could provide the appropriate dose for the patient, while minimizing any discarded amounts.

a. For example, metoclopramide (administered for Diabetic Gastric Stasis not nausea and vomiting associated with the dialysis treatment) is supplied as 10 mg in a 2 mL single-use vial. If ESRD dialysis facility staff administers 5 mg of metoclopramide to a patient, the most efficient way to administer this dose is with half of one 10 mg vial.

3. Any discarded amount of a renal dialysis drug or biological product from a single-dose container or single-use package for which an ESRD facility bills under the ESRD PPS must be discarded and may not be used for another patient regardless of whether the other patient has Medicare.

The following examples illustrate appropriate usage of the JW and JZ modifiers for any renal dialysis drug or biological product from a single-dose container or single-use package that is paid for under the ESRD PPS.

- Example #1 Billing for a renal dialysis drug or biological product with a discarded amount:

  Medicare requires discarded drugs be reported with the JW modifier on a separate line.

Claim line #1:

a. HCPCS code for drug administered

b. No modifier

c. Number of billing units administered to the patient

d. Calculated submitted price for ONLY the amount of drug administered

Claim line #2:

a. HCPCS code for drug discarded

b. JW modifier to indicate discard

c. Number of billing units discarded

d. Calculated submitted price for ONLY the amount of drug discarded

Using the example given above, metoclopramide 5 mg would be identified on one line as being given to the patient. On the next line, metoclopramide 5 mg would be identified with the JW modifier to indicate 5 mg of metoclopramide was discarded.

- Example #2 Billing for a renal dialysis drug or biological product with no discarded amount:

Effective January 1, 2025, Medicare requires the JZ modifier on all claim for single-dose containers where there are no discarded amounts.

Claim line #1:

a. HCPCS code for drug administered

b. JZ modifier to indicate no discarded amount

c. Number of billing units administered to the patient

d. Calculate submitted price for the amount administered

For example, if ESRD facility staff administers 10 mg of metoclopramide to a patient, the most efficient way to administer this dose is with one 10 mg vial, and this would be identified on one line as being given to the patient with the identifier JZ because there is no discarded amount.

Requirement of "Time on Machine" Hemodialysis Treatment Data as a Recordkeeping and Cost Reporting Requirement for Outpatient Maintenance Dialysis

As discussed in the CY 2024 ESRD PPS final rule (88 FR 76397), CMS contracted with a data contractor to conduct research and analysis to refine the case-mix adjustment model. A Technical Expert Panel (TEP) was held on December 6, 2018, to discuss options for improving data collection to refine the ESRD PPS case-mix adjustment model.

The composite rate comprises payment for the basic dialysis treatment received by all ESRD PPS beneficiaries. In order to more precisely estimate the average cost of a dialysis treatment, it is critical to know the variation in treatment-level costs for each component of the composite rate. Under current reporting practices, there are no data on the patient- and treatment-level variation in the cost of composite rate items and services included under the ESRD PPS. The data contractor presented the participants in the TEP with options for optimizing data collection on composite rate items and services, and each option was specifically formulated to minimize reporting burden for ESRD facilities where possible. An option presented and preferred by TEP participants was reporting duration of dialysis on Medicare ESRD PPS claims.

Beginning with dates of service on or after January 1, 2025, CMS is implementing Value Code D6:

Title (short descriptor): The total number of minutes of dialysis provided during the billing period.

Designation: NM (Non-monetary)

Definition: The number of minutes (rounded to the nearest whole minute) between the beginning of dialysis treatment time (i.e. , when the start button on the blood pump is pushed) and the end of dialysis treatment time (i.e., when the stop button on the blood bump is pushed). ESRD facilities are not required to reduce the total count of minutes to account for disruptions due to machine failures, bathroom breaks, or other stoppage, but the number of minutes reported should not include time outside the start and end of the dialysis session (for example, time when the patient is in-center waiting to be seated in a chair). The time on dialysis machine duration begins when the actual dialysis treatment starts and ends when the actual dialysis treatment is complete. The units reported must exceed 1.

The ESRD facility counts only the minutes spent dialyzing. It reports in whole minutes (rounded to the nearest whole minute and reported left of the decimal). The value in the monthly claim line is the total number of minutes of dialysis provided during the month.

ESRD facilities are required to report Value Code D6 on ESRD PPS claims for in-facility maintenance hemodialysis treatments, as well as any training or retraining treatments that are provided in-facility. As explained in the CY 2024 ESRD PPS final rule (88 FR 76397), CMS will use time on machine data to help us evaluate and monitor the accuracy of our payments for patient-level adjustment factors. CMS will also evaluate whether the data could be used to inform future refinements to the existing patient-level adjustment factors set forth at § 413.235(a), which include patient age, body mass index, body surface area, and co-morbidities such as sickle cell anemia. Finally, CMS will review the data for its potential to identify any disparities from a health equity perspective that may support proposing, in future rulemaking, new patient-level adjustment factors, including potential social determinants of health factors. CMS has not proposed any changes to ESRD PPS patient-level adjusters in relation to this new reporting requirement. Any potential new case-mix adjusters or changes to the case-mix adjusters would be the subject of separate notice and comment rulemaking in the future.

Consolidated Billing Requirements:

- **There are nine (9) HCPCS codes added to the consolidated billing list for CY 2025. See Attachment B.**

TDAPA: Effective January 1, 2025, vadadustat, an oral hypoxia-inducible factor prolyl hydroxylase (HIF PH) inhibitor indicated for the treatment of anemia due to chronic kidney disease (CKD) in adults who have been receiving dialysis for at least three months, qualifies for the TDAPA as a drug or biological product used to treat or manage a condition for which there is an existing ESRD PPS functional category - specifically, the anemia management category.

ESRD facilities should report the AX modifier (item furnished in conjunction with dialysis services) with the HCPCS code to get payment for the TDAPA-eligible drug. While this drug is eligible for the TDAPA, it does not qualify toward outlier payments. We note that ESRD facilities should only use the AX modifier for a drug or biological product that qualifies for payment using the TDAPA.

J0901, Vadadustat, oral, 1 mg (for esrd on dialysis)

Because vadadustat falls within the existing ESRD PPS functional category of anemia management and is only used for treating renal dialysis patients, it is considered to be a drug that is always used for the treatment of ESRD. ESRD facilities will not receive separate payment for J0901 with or without the AY modifier, and the claims shall process the line item as covered with no separate payment under the ESRD PPS. The ESRD PPS CB requirements will be updated to include J0901. The payer-only value code Q8 – Total TDAPA Amount is used to capture the add-on payment.

Effective January 1, 2025, CMS is updating the Consolidated Billing list as shown in Attachment B to include J0901.

In addition, there are two eligible drugs for which ESRD facilities will continue to receive payment using the TDAPA under the ESRD PPS for CY 2025; daprodustat and taurolidine and heparin sodium.

- ESRD facilities will be paid the TDAPA for daprodustat beginning October 1, 2023, through September 30, 2025.

- The TDAPA for daprodustat will be calculated as described in CR 13275.
- ESRD facilities will be paid the TDAPA for taurolidine and heparin sodium beginning July 1, 2024, through June 30, 2026.
- The TDAPA for taurolidine and heparin sodium will be calculated as described in CR 13608.

The following HCPCS codes should be used:

- J0889, daprodustat, oral, 1 mg, (for esrd on dialysis)
- J0911, Instillation, taurolidine 1.35 mg and heparin sodium 100 units (central venous catheter lock for adult patients receiving chronic hemodialysis)

ESRD facilities should report the AX modifier (item furnished in conjunction with dialysis services) with the HCPCS code for these drugs to receive payment for the drugs using the TDAPA. While these drugs are eligible for the TDAPA, they do not qualify toward outlier payments. Furthermore, the JW modifier should be used by facilities on the 72x claim to report the amount of taurolidine and heparin sodium that is discarded and eligible for payment under the ESRD PPS. The AX modifier should be reported in the first modifier position and the JW modifier in the second modifier position.

TPNIES: There are no renal dialysis equipment or supplies eligible for the TPNIES for CY 2025.

TPNIES for CRAs:

There are no TPNIES for CRAs continuing for CY 2025 that are home dialysis machines for hemodialysis.

- The CY 2025 average per treatment CRA for TPNIES offset amount is $10.22.

AKI Dialysis Payment Rate Updates:

- The AKI dialysis payment rate for CY 2025 is $273.82, which is the base rate under the ESRD PPS for CY 2025 reduced by a budget neutrality factor of $0.00 per treatment for the home and self-dialysis add-on payment adjustment under 42 C.F.R. § 413.373.
- The labor-related share is 55.2 percent.
- The AKI dialysis payment rate is adjusted for wages using the same wage index that is used under the ESRD PPS.
- The AKI dialysis payment rate is not reduced for the ESRD Quality Incentive Program (QIP).
- The TDAPA does not apply to AKI claims.
- The TPNIES does not apply to AKI claims.
- The TPEAPA does not apply to AKI claims.
- The post-TDAPA payment adjustment does not apply to AKI claims.
- As discussed in section III.E of the CY 2025 ESRD PPS final rule, beneficiaries with AKI will still be able to receive phosphate binders through part D during the TDAPA period for phosphate binders under the ESRD PPS.

Home dialysis for AKI:

- Beginning January 1, 2025, payment will be made for renal dialysis services provided to AKI beneficiaries who dialyze at home. The home dialysis payment rate for AKI beneficiaries will be the same as for beneficiaries who dialyze in-center, $273.82.

- Beginning January 1, 2025, AKI beneficiaries will be eligible for the home dialysis add-on payment adjustment described at section 413.373, which is $95.60 adjusted by the providing ESRD facility's wage index. This payment was extended budget neutrally with a corresponding decrease to the base AKI payment rate that rounds to $0.00 per treatment based on projected utilization.

IV. PROVIDER EDUCATION

Medicare Learning Network® (MLN): CMS will develop and release national provider education content and market it through the MLN Connects® newsletter shortly after we issue the CR. MACs shall link to relevant information on your website and follow IOM Pub. No. 100-09 Chapter 6, Section 50.2.4.1 for distributing the newsletter to providers. When you follow this manual section, you don't need to separately track and report MLN content releases. You may supplement with your local educational content after we release the newsletter.

[1] Outlier services imputed payment amounts. Oral or other equivalent forms of Part B injectable drugs included in the ESRD PPS bundle (Note: oral-only phosphate binders are billed by HCPCS and not by NDC in CY 2025).

[2] The mean dispensing fee of the NDCs listed above is $0.58. This amount will be applied to each NDC included fee on the monthly claim. We will limit 1 dispensing per NDC per month. Providers should report the quantity in the smallest available unit. This is necessary because Medicare is using the mean per unit cost in calculating the outlier. For example, if the provider reports NDC 00054312041 Calcitriol 1 mcg/ml oral solution (15/ml/bottle) reported and uses the full 15 ml bottle, the quantity is as 15, not 1. This allows for the most accurate calculation for the outlier.

HCPCS	Description
J0278	Injection, amikacin sulfate, 100 mg
J0290	INJECTION, AMPICILLIN SODIUM, 500 MG
J0606	Injection, etelcalcetide, 0.1 mg
J0636	INJECTION, CALCITRIOL, 0.1 MCG
J0692	INJECTION, CEFEPIME HYDROCHLORIDE, 500 MG
J0696	INJECTION, CEFTRIAXONE SODIUM, PER 250 MG
J0713	INJECTION, CEFTAZIDIME, PER 500 MG
J0878	Injection, daptomycin, 1 mg
J0879	Injection, difelikefalin, 0.1 microgram, (for esrd on dialysis)
J0882	Injection, darbepoetin alfa, 1 microgram (for esrd on dialysis)
J0887	Injection, epoetin beta, 1 microgram, (for esrd on dialysis)
J0911	Instillation, taurolidine 1.35 mg and heparin sodium 100 units (central venous catheter lock for adult patients receiving chronic hemodialysis)
J1580	INJECTION, GARAMYCIN, GENTAMICIN, UP TO 80 MG
J1642	INJECTION, HEPARIN SODIUM, (HEPARIN LOCK FLUSH), PER 10 UNITS
J1756	Injection, iron sucrose, 1 mg
J1956	INJECTION, LEVOFLOXACIN, 250 MG
J2185	Injection, meropenem, 100 mg
J2310	INJECTION, NALOXONE HYDROCHLORIDE, PER 1 MG
J2357	Injection, omalizumab, 5 mg
J2405	INJECTION, ONDANSETRON HYDROCHLORIDE, PER 1 MG
J2550	INJECTION, PROMETHAZINE HCL, UP TO 50 MG
J2704	Injection, propofol, 10 mg
J2916	INJECTION, SODIUM FERRIC GLUCONATE COMPLEX IN SUCROSE INJECTION, 12.5 MG
J2997	INJECTION, ALTEPLASE RECOMBINANT, 1 MG
J7050	INFUSION, NORMAL SALINE SOLUTION , 250 CC
Q0139	Injection, ferumoxytol, for treatment of iron deficiency anemia, 1 mg (for esrd on dialysis)

Attachment D- HCPCS with a mix of single-dose and multi-dose NDCs in ESRD claims

HCPCS	Description
J0690	INJECTION, CEFAZOLIN SODIUM, 500 MG
J1200	INJECTION, DIPHENHYDRAMINE HCL, UP TO 50 MG
J1270	INJECTION, DOXERCALCIFEROL, 1 MCG
J1644	INJECTION, HEPARIN SODIUM, PER 1000 UNITS
J2501	Injection, paricalcitol, 1 mcg
J3370	INJECTION, VANCOMYCIN HCL, 500 MG
Q4081	Injection, epoetin alfa, 100 units (for esrd on dialysis)
Q5105	Injection, epoetin alfa-epbx, biosimilar, (retacrit) (for esrd on dialysis), 100 units
