Medicine: Psychiatry

Question: Can Psychotherapy codes 90832, 90834, or 90837 be used with E/M codes 99201-99205 or 99211-99215?

Answer: No. However, if both Evaluation and Management (E/M) services and Psychotherapy services are significant and separately identifiable, codes 90833, 90836, and 90838, which are specific for psychotherapy when performed with E/M services, may be used as add-on codes to the E/M service.
