

Internal Medicine Coding Alert

Clip & Save: Which Elements Stack Up to Moderate Complexity? Find Out Here

Save this chart as your MDM breakdown guide.

You can easily calculate the correct number of elements for a given medical decision-making (MDM) level if you refer to this chart. The table shows the progression of the elements that each level of MDM requires. To qualify for a given type of decision-making, the internist's documentation must meet or exceed two of three elements.
