An independent licensee of the Blue Cross and Blue Shield Association.

## Diabetic Test Strips

Policy # 00322

Original Effective Date: 05/22/2013

Current Effective Date: 05/21/2014

*Applies to all products administered or underwritten by Blue Cross and Blue Shield of Louisiana and its subsidiary, HMO Louisiana, Inc. (collectively referred to as the "Company"), unless otherwise provided in the applicable contract. Medical technology is constantly evolving, and we reserve the right to review and update Medical Policy periodically.*

### When Services May Be Eligible for Coverage

Coverage for eligible medical treatments or procedures, drugs, devices or biological products may be provided only if:

- Benefits are available in the member's contract/certificate, and
- Medical necessity criteria and guidelines are met.

Based on review of available data, the Company may consider brands other than ACCU-CHECK<sup>®‡</sup>, CONTOUR<sup>®‡</sup>, or BREEZE 2<sup>®‡</sup> blood glucose test strips to be **eligible for coverage** when one of the below patient selection criteria is met:

#### Patient Selection Criteria

Coverage eligibility will be considered for brands other than ACCU-CHECK, CONTOUR, or BREEZE 2 blood glucose test strips when one of the following criteria is met:

- The patient has visual impairment that would require a specific brand (other than ACCU-CHECK, CONTOUR, or BREEZE 2) of blood glucose test strips; or
- The patient has an insulin pump that would require a specific brand (other than ACCU-CHECK, CONTOUR, or BREEZE 2) of blood glucose test strips; or
- There is clinical evidence or patient history that suggests the use of ACCU-CHECK, CONTOUR, or BREEZE 2 brand blood glucose test strips will be ineffective or cause an adverse reaction to the patient.

### When Services Are Considered Not Medically Necessary

Based on review of available data, the Company considers the use of brands other than ACCU-CHECK, CONTOUR, or BREEZE 2 blood glucose test strips when patient selection criteria are not met or for usage not included in the above patient selection criteria to be **not medically necessary**.\*\*

### Background/Overview

Blood glucose test strips are used in conjunction with a blood glucose meter to measure a patient's blood glucose.

### Rationale/Source

The patient selection criteria presented in this policy takes into consideration clinical evidence or patient history that suggests the use of ACCU-CHECK, CONTOUR, or BREEZE 2 brand blood glucose test strips will be ineffective or cause an adverse reaction to the patient. It also takes into account whether or not the patient has visual impairment or uses an insulin pump that would require a different brand of blood glucose test strips (other than ACCU-CHECK, CONTOUR, or BREEZE 2). Based on a review of the data, in the absence of the above mentioned caveats, there is no advantage of using a brand other than ACCU-CHECK, CONTOUR, or BREEZE 2 brand blood glucose test strips.

## Policy History

Original Effective Date: 05/22/2013

Current Effective Date: 05/21/2014

05/02/2013 Medical Policy Committee review

05/22/2013 Medical Policy Implementation Committee approval. New policy.

05/01/2014 Medical Policy Committee review

05/21/2014 Medical Policy Implementation Committee approval. No change to coverage.

Next Scheduled Review Date: 05/2015

\*\*Medically Necessary (or "Medical Necessity") - Health care services, treatment, procedures, equipment, drugs, devices, items or supplies that a Provider, exercising prudent clinical judgment, would provide to a patient for the purpose of preventing, evaluating, diagnosing or treating an illness, injury, disease or its symptoms, and that are:

- A. in accordance with nationally accepted standards of medical practice;
- B. clinically appropriate, in terms of type, frequency, extent, level of care, site and duration, and considered effective for the patient's illness, injury or disease; and
- C. not primarily for the personal comfort or convenience of the patient, physician or other health care provider, and not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of that patient's illness, injury or disease.

For these purposes, "nationally accepted standards of medical practice" means standards that are based on credible scientific evidence published in peer-reviewed medical literature generally recognized by the relevant medical community, Physician Specialty Society recommendations and the views of Physicians practicing in relevant clinical areas and any other relevant factors.
