Commercial Members: Managed Care (HMO and POS), PPO, and Indemnity Medicare HMO BlueSM and Medicare PPO BlueSM Members

Please Note: According to the American Psychiatric Association, the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-5) defines gender dysphoria as a condition where a person's gender at birth is contrary to the one they identify with. This definition replaces the criteria for gender identity disorder which will no longer be used in DSM-5. However, ICD-9 and ICD-10 codes continue to use the term gender identity disorder, and providers will need to submit claims for coverage using this diagnosis.

Gender Reassignment Surgery (GRS) may be **MEDICALLY NECESSARY** when **ALL** of the following candidate criteria are met and supporting provider documentation is provided:

- The candidate is at least 18 years of age, AND
- The candidate has been diagnosed with gender dysphoria (ICD-9 Code 302.85 gender identity disorder), including meeting **ALL** of the following indications:
 - The desire to live and be accepted as a member of the opposite sex, typically accompanied by the desire to make the physical body as congruent as possible with the identified sex through surgery and hormone treatment, AND
 - The new gender identity has been present for at least 24 months, AND

The GID is not a symptom of another mental disorder.

Gender Reassignment Surgery (GRS) may be **MEDICALLY NECESSARY** when **ALL** of the following candidate criteria are met and supporting provider documentation is provided:

- The candidate is at least 18 years of age, AND

- The candidate has been diagnosed with gender dysphoria (ICD-9 Code 302.85 gender identity disorder), including meeting **ALL** of the following indications:
 - The desire to live and be accepted as a member of the opposite sex, typically accompanied by the desire to make the physical body as congruent as possible with the identified sex through surgery and hormone treatment, AND
 - The new gender identity has been present for at least 24 months, AND
 - The gender dysphoria (ICD-9 Code 302.85 gender identity disorder) is not a symptom of another mental disorder
- For those candidates without a medical contraindication the candidate has undergone a minimum of 12 months of continuous hormonal therapy that is:
 - Recommended by a mental health professional, AND
 - Provided under the supervision of a licensed clinician, AND
 - The supervising clinician indicates that the patient has taken the hormones as directed
- For candidates requesting female to male surgery only:
 - When the initial requested surgery is solely a mastectomy, the treating clinician may indicate that no hormonal treatment is required prior to performance of the mastectomy. In this case, the 12 month requirement for hormonal treatment will be waived only when all other criteria contained in this policy, and the members subscriber certificate/benefit description are met.
- The candidate has completed a minimum of 12 months of successful continuous full time real-life experience in their new gender, with no returning to their original gender including one or more of the following:
 - Maintain part- or full-time employment
 - Function as a student in an academic setting, or
 - Function in a community-based volunteer activity
- If the candidate does not meet the 12 month time frame criteria of 12 months of successful continuous full time real-life experience in their new gender noted above, then the treating clinician must submit information indicating why it would be clinically inappropriate to require the candidate to meet these criteria. When submitted, the criteria of 12 months of successful continuous full time real-life experience in their new gender will be waived unless the criteria noted above are specified as required in the candidate's subscriber certificate/benefit description.

Provider Documentation Criteria

The following must be documented in the patient's medical record:

1. Documentation must attest to the psychological aspects of the candidate's gender dysphoria (ICD-9 Code 302.85 gender identity disorder).
 - a. One of the medical notes must be from a behavioral health professional with a doctoral degree (Ph.D., M.D., Ed.D., D.Sc., D.S.W., or Psy.D) who is capable of adequately evaluating if the candidate has any co-morbid psychiatric conditions.
 - b. One of the medical notes must be from the candidate's primary clinician or behavioral health provider, who has treated the candidate for a minimum of 18 months (Note: if the candidate has not been treated continuously by one clinician for 18 months but has transferred care from one clinician to a second clinician, then both clinicians must have documentation and their combined treatment must have been for 18 months). The medical notes must document **ALL** of the following:
 - i. Whether the author of the letter is part of a gender dysphoria (ICD-9 Code 302.85 gender identity disorder) treatment team, AND
 - ii. The candidate's general identifying characteristics, AND
 - iii. The initial and evolving gender, sexual, and other psychiatric diagnoses, AND
 - iv. The duration of their professional relationship including the type of psychotherapy or evaluation that the candidate underwent, AND
 - v. The eligibility criteria that have been met by the candidate, AND
 - vi. The primary clinician or mental health professional's rationale for surgery, AND
 - vii. The degree to which the candidate has followed the treatment and experiential requirements to date and the likelihood of future compliance, AND

- viii. The extent of participation in psychotherapy throughout the 12 month real-life trial, (if such therapy is recommended by a treating medical or behavioral health practitioner), AND
- ix. That during the 12 month, real-life experience (for candidates not meeting the 12 month candidate criteria the letter should still comment on the candidates ability to function and experience in the desired gender role), persons other than the treating therapist were aware of the candidate's experience in the desired gender role and could attest to the candidate's ability to function in the new role, AND
- x. Demonstrable progress on the part of the candidate in consolidating the new gender identity, including improvements in the ability to handle:
 - Work, family, and interpersonal issues
 - Behavioral health issues, should they exist. This implies satisfactory control of issues such as:
 - Sociopathy
 - Substance abuse
 - Psychosis, or
 - Suicidality
- c. If the medical notes specified in 1a and 1b above come from the same clinician, then a medical note from a second clinician or behavioral health provider familiar with the candidate corroborating the information provided by the first clinician is required.
- d. Documentation must also be from the treating surgeon. If one of the previously described medical notes is from the treating surgeon then it must contain the documentation noted in the section below. All letters from a treating surgeon must confirm that:
 - i. The candidate meets the "candidate criteria" listed in this policy, AND
 - ii. The treating surgeon feels that the candidate is likely to benefit from surgery, AND
 - iii. The surgeon has personally communicated with the treating mental health provider or primary clinician treating the candidate, AND
 - iv. The surgeon has personally communicated with the candidate and that the candidate understands the ramifications of surgery, including:
 - The required length of hospitalizations,
 - Possible complications of the surgery, and
 - The post surgical rehabilitation requirements of the various surgical approaches and the planned surgery.

GRS is **INVESTIGATIONAL** in the following circumstances:

- When one or more of the criteria above have not been met
- Any services performed to reverse GRS, AND
- GRS procedures that are considered cosmetic are not covered unless otherwise specified in the member's individual subscriber certificate/benefit description.

CPT Codes / HCPCS Codes / ICD-9 Codes

The following codes are included below for informational purposes. Inclusion or exclusion of a code does not constitute or imply member coverage or provider reimbursement. Please refer to the member's

contract benefits in effect at the time of service to determine coverage or non-coverage as it applies to an individual member. A draft of future ICD-10 Coding related to this document, as it might look today, is included below for your reference.

Providers should report all services using the most up-to-date industry-standard procedure, revenue, and diagnosis codes, including modifiers where applicable.

Description

Gender reassignment surgery (GRS) is a treatment option for Gender Identity Disorder (GID), a condition in which a person feels a strong and persistent identification with the opposite gender accompanied by a severe sense of discomfort with their own gender. People with GID often report a feeling of being born as the wrong sex.

GRS is not a single procedure, but part of a complex process involving multiple medical, psychiatric, and surgical modalities performed in conjunction with each other to help the candidate for gender reassignment achieve successful behavioral and medical outcomes. Before undertaking GRS, candidates need to undergo important medical and psychological evaluations, and begin medical therapies and behavioral trials to confirm that surgery is the most appropriate treatment choice.
