Medicare Program; Specialty Care Models To Improve Quality of Care and Reduce Expenditures; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule; correction.

SUMMARY: This document corrects technical and typographical errors that appeared in the final rule published in the September 29, 2020 **Federal Register** entitled “Medicare Program; Specialty Care Models To Improve Quality of Care and Reduce Expenditures,” which established the Radiation Oncology Model and the End-Stage Renal Disease Treatment Choices Model.

DATES: Effective date: This correcting document is effective on December 2, 2020.

FOR FURTHER INFORMATION CONTACT: Rebecca Cole, (410) 786–1589.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2020–20907 of September 29, 2020 (85 FR 61114), there were a number of technical errors that are identified and corrected in this correcting document. The provisions in this correction document are effective as if they had been included in the document published September 29, 2020. Accordingly, the corrections are effective November 30, 2020.

II. Summary of Errors

On page 61159, in our discussion of the entitled “Episode Length” there is

an error in an in-text citation to the proposed rule, so 84 FR 3499 is corrected to 84 FR 34499, along with the correct link to the proposed rule.

On pages 61289, 61292, 61295, 61296, 61297, 61319, 61327, 61328, 61329, 61349, 61350, 61353, and 61354, we made errors in the numbering and reference numbers for several tables.

On pages 61357, 61358, and 61359 in our discussion of the effects on Radiation Oncology (RO) Participants, we made errors in wage-related information. On page 61359, in our discussion of the Regulatory Flexibility Act requirements for the Radiation Oncology Model, we made a calculation error regarding the distribution of payment changes. Under Medicare FFS, physician group practices (PGPs) are largely paid through the Medicare Physician Fee Schedule (PFS) for radiotherapy services while hospital outpatient departments (HOPDs) are paid through the Outpatient Prospective Payment System (OPPS). Unit-cost increases under the PFS are projected to be lower than under the OPPS. Therefore, the RO Model will affect payments to RO participants that are PGPs and HOPDs differentially over time through the use of a site neutral update factor. The referenced calculations are revised to properly value this effect.

III. Waiver of Proposed Rulemaking, 60-Day Comment Period, and Delay in Effective Date

Under 5 U.S.C. 553(b) of the Administrative Procedure Act (APA), the agency is required to publish a notice of proposed rulemaking in the **Federal Register** to provide a period for public comment before the provisions of a rule take effect. Similarly, section 1871(b)(1) of the Social Security Act (the Act) requires the Secretary to provide for notice of the proposed rulemaking in the **Federal Register** and provide a period of not less than 60 days for public comment. In addition, section 553(d) of the APA (5 U.S.C. 553(d)) and section 1871(e)(1)(B)(i) of the Act mandate a 30-day delay in effective date after issuance or publication of a rule. Sections 553(b)(B) and 553(d)(3) of the APA provide for exceptions from the notice and comment and delay in the effective date APA requirements; in cases in which these exceptions apply, sections 1871(b)(2)(C) and 1871(e)(1)(B)(ii) of the Act provide exceptions from the notice and 60-day comment period and delay in effective date requirements of the Act as well. Section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act authorize an agency to dispense with

normal rulemaking requirements for good cause if the agency makes a finding that the notice and comment rulemaking processes are impracticable, unnecessary, or contrary to the public interest. In addition, both section 553(d)(3) of the APA and section 1871(e)(1)(B)(ii) of the Act allow the agency to avoid the 30-day delay in effective date where such delay is contrary to the public interest and the agency includes a statement of support.

We believe that this correcting document does not constitute a rule that would be subject to the notice and comment or delayed effective date requirements. This document corrects technical and typographic errors in the Medicare Program; Specialty Care Models To Improve Quality of Care and Reduce Expenditures final rule (the Specialty Care Models final rule), but does not make substantive changes to the policies or payment methodologies that were adopted in the final rule. As a result, this corrective document is intended to ensure that the information in the Specialty Care Models final rule accurately reflects the policies adopted in that document.

In addition, even if this was a rulemaking to which the notice and comment procedures and delayed effective date requirements applied, we find that there is good cause to waive such requirements. Undertaking further notice and comment procedures to incorporate the corrections in this document into the final rule would be contrary to the public interest because it is in the public’s interest for model participants to receive appropriate payments in as timely a manner as possible and to ensure that the Specialty Care Models final rule accurately reflects our methodologies and policies as of the date they take effect and are applicable.

Furthermore, such procedures would be unnecessary, as we are not altering the implementation of the models or the way participants in the models will perform, but rather we are simply correctly implementing the policies that we previously proposed, received comment on, and subsequently finalized. This correcting document is intended solely to ensure that the Specialty Care Models final rule accurately reflects these payment methodologies and policies. For these reasons, we believe we have good cause to waive the notice and comment and effective date requirements.
