State and Federal mandates and health plan member contract language, including specific provisions/exclusions, take precedence over Medical Policy and must be considered first in determining eligibility for coverage. To verify a member's benefits, contact [Blue Cross and Blue Shield of Kansas Customer Service](#).

The BCBSKS Medical Policies contained herein are for informational purposes and apply only to members who have health insurance through BCBSKS or who are covered by a self-insured group plan administered by BCBSKS. Medical Policy for FEP members is subject to FEP medical policy which may differ from BCBSKS Medical Policy.

The medical policies do not constitute medical advice or medical care. Treating health care providers are independent contractors and are neither employees nor agents of Blue Cross and Blue Shield of Kansas and are solely responsible for diagnosis, treatment and medical advice.

If your patient is covered under a different Blue Cross and Blue Shield plan, please refer to the Medical Policies of that plan.

DESCRIPTION

Moderate sedation, previously referred to as "conscious" sedation, is generally used for both diagnostic and uncomplicated therapeutic endoscopic procedures. Moderate sedation involves the administration of medication with or without analgesia to achieve a state of depressed consciousness while maintaining the patient's ability to purposefully or cooperatively respond to verbal or light tactile stimulation. It includes pre- and post-sedation evaluations, administration of sedation, and monitoring of the cardiorespiratory functions (heart rate, blood pressure, and oxygen level.) Moderate sedation is commonly performed using diazepines with or without narcotic agents. For routine endoscopic procedures and screenings among patients without risk factors or significant medical conditions, moderate sedation is considered a sufficient level of sedation. Moderate sedation using diazepines, with or without narcotics, is usually administered by, or under the supervision of, the physician providing the primary procedure.

According to the American Society of Anesthesiologists' (ASA) standard for monitoring, Monitored Anesthesia Care (MAC) should be provided by qualified anesthesia personnel. By this standard, the personnel must be in addition to the physician providing the primary procedure. and present continuously to monitor the patient and provide anesthesia care. MAC may include varying levels of sedation, analgesia, and anxiolysis, including but not limited to moderate sedation. For patients at high risk of an unsuccessful procedure under moderate sedation, this allows for the safe continuation of the procedure under deep or general anesthesia by trained personnel. Monitored anesthesia care includes all aspects of anesthesia care – a pre-procedure visit, intra-procedure care and post-procedure anesthesia management. During MAC, the anesthesiology personnel provides or medically directs a number of specific services such as administration of sedatives, analgesics, hypnotics, anesthetic agents or other medications as necessary.

Propofol is an agent that has been used increasingly to provide monitored anesthesia for endoscopic procedures. Propofol is associated with a rapid onset of action and fast recovery from sedation. However, there have been concerns about potential side effects and safety when used by non-anesthesiologists. It has the potential to induce general anesthesia, and there is no pharmacologic antagonist to reverse its action.

Regulatory Status

In October, 1989 propofol "Diprivan®" (AstraZeneca) was first approved by the FDA through the premarket approval process for the induction and maintenance of anesthesia. The current FDA-approved label for Diprivan states that it is indicated for initiation and maintenance of monitored anesthesia care (MAC) sedation, combined sedation and regional anesthesia, or intensive care unit (ICU) sedation of intubated, mechanically ventilated patients (adults only). It is also approved for induction of general anesthesia in patients older than or equal to 3 years of age, and maintenance of general anesthesia in patients older than or equal to 2 months of age.

POLICY

- A. Monitoring of sedation by an anesthesia provider for gastrointestinal endoscopies, CT scans, MRIs, cardiac catheterizations, and PTCAs is generally considered **not medically necessary**.

HOWEVER,

- B. Monitored anesthesia or general anesthesia may be **medically necessary** for gastrointestinal endoscopies, CT scans, MRIs, cardiac catheterizations, and PTCAs when billed with any of the following conditions:
1. Pregnancy
 2. 12 years of age or younger
 3. 70 years of age or older
 4. An increased risk of complication due to severe co-morbidity according to the ASA Physical Status Class P3 to P5
 5. Opiate, alcohol, or sedative dependent
 6. Morbid obesity
 7. Prolonged or therapeutic endoscopic procedures requiring deep sedation, or

8. Acutely agitated uncooperative patients, or
 9. Patients with increased risk for airway obstruction due to anatomic variation including a history of sleep apnea or stridor, dysmorphic facial features, and certain oral (e.g., macroglossia), neck (e.g., neck mass), and jaw (e.g., micrognathia) abnormalities.
- C. Use of monitored anesthesia care is considered **not medically necessary** for procedures in patients at average risk related to use of anesthesia and sedation.

RATIONALE

Technology Assessments, Guidelines and Position Statements

Recent guidelines regarding sedation during endoscopy were released by the American Society for Gastrointestinal Endoscopy (ASGE). (1) These guidelines indicate "Adequate and safe sedation can be achieved in most patients undergoing routine esophagogastroduodenoscopy [EGD] and colonoscopy by using an intravenous benzodiazepine and opioid combination." These guidelines also include a discussion of use of propofol for routine endoscopy, and their overall conclusion is that "clinically important benefits in average-risk patients undergoing upper endoscopy and colonoscopy have not been consistently demonstrated with regard to patient satisfaction and safety. Therefore, the routine use of propofol in average-risk patients cannot be endorsed."

BENEFITS APPLICATION

BCBSKS will allow payment for monitoring of sedation services in an inpatient or outpatient facility when billed by an anesthesia provider capable of initiating general anesthesia should it be needed. BCBSKS will not allow payment for monitoring of sedation services in an office setting, with exception of those defined in K.S.A 40-2, 165.

CODING

The following codes for treatment and procedures applicable to this policy are included below for informational purposes. Inclusion or exclusion of a procedure, diagnosis or device code(s) does not constitute or imply member coverage or provider reimbursement. Please refer to the member's contract benefits in effect at the time of service to determine coverage or non-coverage of these services as it applies to an individual member.

CPT/HCPCS

- | | |
|-------|--|
| 00740 | Anesthesia for upper gastrointestinal endoscopic procedures, endoscope introduced proximal to duodenum |
| 00810 | Anesthesia for lower intestinal endoscopic procedures, endoscope introduced distal to duodenum |
| 01920 | Anesthesia for cardiac catheterization including coronary angiography and ventriculography (not to include Swan-Ganz catheter) |

- For other medical conditions increasing the risk in requiring monitored or general anesthesia services for these procedures such as behavioral, dysmorphic, and neurological conditions, please attach Modifier-22 and submit medical records.
- Unusual anesthesia is an additional level of services that are applicable to endoscopies to address those patients who receive services in a hospital setting, to include ASCs. Claims for this level should be billed using 00740 or 00810 with modifier 23 describing unusual anesthesia only when performed as inpatient or outpatient at a hospital setting, to include ASCs.
