State and Federal mandates and health plan member contract language, including specific provisions/exclusions, take precedence over Medical Policy and must be considered first in determining eligibility for coverage. To verify a member's benefits, contact [Blue Cross and Blue Shield of Kansas Customer Service](#).

The BCBSKS Medical Policies contained herein are for informational purposes and apply only to members who have health insurance through BCBSKS or who are covered by a self-insured group plan administered by BCBSKS. Medical Policy for FEP members is subject to FEP medical policy which may differ from BCBSKS Medical Policy.

The medical policies do not constitute medical advice or medical care. Treating health care providers are independent contractors and are neither employees nor agents of Blue Cross and Blue Shield of Kansas and are solely responsible for diagnosis, treatment and medical advice.

If your patient is covered under a different Blue Cross and Blue Shield plan, please refer to the Medical Policies of that plan.

DESCRIPTION

Regional nerve blocks are a form of pain management lasting 10 to 12 hours depending on the technique. A regional nerve block is placed preoperative or postoperatively for postoperative pain control to decrease the need for narcotics and patient-controlled analgesia (PCA) machines.

POLICY

- A. A regional nerve block will be allowed preoperatively for pain control along with general anesthesia for the following:
1. Shoulder surgeries (arthroscopic or otherwise) that involve cutting or drilling of the bone including placement of suture anchors.
 2. Knee surgeries – ACL (anterior cruciate ligament), Fulkerson, High Tibial Osteotomy, and Total knee replacement, repair, or revision

- B. A regional nerve block will **not** be allowed preoperatively for pain control along with general anesthesia for the following:
1. Diagnostic arthroscopic shoulder surgery that does not involve cutting or drilling of the bone or placement of suture anchors
 2. Knee surgeries not listed above
 3. All other surgeries not listed
- C. A regional nerve block will be allowed postoperatively for pain control following general anesthesia for any condition.
- D. A regional nerve block would be appropriate for both inpatient and outpatient settings.

DOCUMENTATION

The medical record must indicate when the regional nerve block was done.

CODING

The following codes for treatment and procedures applicable to this policy are included below for informational purposes. Inclusion or exclusion of a procedure, diagnosis or device code(s) does not constitute or imply member coverage or provider reimbursement. Please refer to the member's contract benefits in effect at the time of service to determine coverage or non-coverage of these services as it applies to an individual member.
